Mike Bidinger

A true analytical engineer and tech enthusiast with data, change and project management knowledge and experience. Apart from the fact that I already have quite a bit of knowledge, I keep challenging myself and others to broaden my knowledge. I bring together the functional requirements, organizational interests and technical possibilities within data-driven solutions. Overseeing the entire process, from the source systems up to and including the analysis, is self-evident. This makes me the link between Business and IT and able to understand the question behind the question, to make the translation between customer and technology. In addition, I'm communicatively strong, proactive and I can work independently as well as together within a cross-functional team.

Work Experience

VDL Nedcar, Born   Feb 2018 – present
  Product Data Manager (Launch and Change Control, Supply)
As a product data manager responsible for the product data quality (BOM and MDM). Managing and developing automation processes for efficiency and quality of product related data (back-end). In addition, responsible for providing the business with accurate product and process information by transforming data (ETL) into information to enable data-driven decision making (front-end).

VDL Nedcar, Born   Dec 2017 – Feb 2018
  Change Controller (Launch and Change Control, Supply)
Responsible for the validation, implementation and processing of product engineering changes. In addition, a hardware/software product implementation specialist.

VDL Nedcar, Born   Jan 2017 – Dec 2017
  SQA Line Complaints E/E (Supplier Quality Assurance)
Production disruption support through product quality issues. When by analysis is determined this is supplier related, complaint costs to the relevant supplier. In addition, responsible for updating software components as a result of engineering changes to the product(s), as well as providing support to the "Rework and Repair" department with the product defect analysis of components.

Prodrive Technologies, Son (Science Park Eindhoven)   Aug 2012 – Jan 2017
  Work Preparator, Test Engineer (SMD Assembly)
Responsible for the quality checks through optical test equipment and programming as well as optimizing the SMD production processes through problem analysis (quality and efficiency improvements). In addition, as a work preparator responsible to ensure a high quality and efficiency standard for the SMD production processes of new products at start of production.

Education

Bachelor of Science (HBO) – Electrical Engineering   2008 – 2012
  Hogeschool Zuyd, Heerlen, Graduated: Yes / ~~No~~

HAVO – Nature and Technology / Nature and Health   2004 – 2008
  Trevianum Scholengroep, Sittard, Graduated: Yes / ~~No~~

Courses

Qlik Sense Developer	2022
Qlik Sense Front End Developer	2020
